RESOLUTION ON THE REPORTS FROM THE COMMISSIONERS OF DIVISIONS ON THE WORKING OF MUNICIPALITIES IN THE BENGAL PRESIDENCY (EXCEPT CALCUTTA) DURING THE YEAR 1922-23.

GOVERNMENT OF BENGAL.

LOCAL SELF-GOVERNMENT DEPARTMENT.

CALCUTTA, THE 28TH APRIL 1924.

RESOLUTION No. 2400M.

READ—

Reports from the Commissioners of Divisions on the working of municipalities in the Bengal Presidency (except Calcutta) during the year 1922-23.

1. **Number of municipalities.**—The number of municipalities rose from 116 to 117 owing to the establishment of a municipality at Rajbari in the district of Faridpur. The boundary of the Khulna municipality was extended so as to include the whole of the Khulna Railway yard of which only a portion was hitherto included. There was no alteration in the boundary of any other municipality. The name of the "Rampur Boalia" municipality has been changed to "Rajshahi" municipality.

12. Conservancy.—The total conservancy charges during the year amounted to Rs. 21 lakhs which was about Rs. 5 lakhs in excess of the receipts from latrine fees.

The sewerage scheme for Dacca was in progress and that for the Titagarh municipality was sanctioned after the close of the year. The Kamarhati and Bhatpara sewerage schemes were under consideration while that for Naihati was held in abeyance for want of funds.

13. Public Health.—The Minister observes with satisfaction that the municipalities have been taking an increasing interest in matters relating to Public Health. Measures for the improvement of sanitation were taken up in many towns by filling up, cleansing or disinfecting insanitary tanks, ditches and *dobas* and removing jungles and noxious vegetation. Notices were also issued on the owners of insanitary tanks requiring them to have these filled up or re-excavated. In Maniktola alone the owners were persuaded to fill up no less than 26 tanks. In Cossipur-Chitpur 22 insanitary tanks were filled up by their owners. In Baranagar two tanks were filled up and four were re-excavated. In Sherpur 10 insanitary ditches were filled up and four tanks were re-excavated by their owners. In Murshidabad all municipal wells were dewatered and cleared of silt. The municipality also completed the construction of the Gobardhan Nullah drain with a Government contribution of Rs. 2,000. In Bhatpara about 40 bighas of the Kamarhati bustee was raised and the filling up of borrow-pits in about four bighas of land was in progress. In Brahmanbaria an insanitary plot of land was acquired and improved by filling up ditches and drains and by excavating two tanks.

Preventive measures were undertaken by a large number of municipalities to check the spread of epidemics. Medicines and disinfectants were freely distributed and special doctors were appointed where necessary. Unwholesome food-stuffs were either destroyed or removed from the local bazars, and persons selling such articles were prosecuted. The Baranagar municipality instituted 35 prosecutions under section 6 of the Bengal Food Adulteration Act, all of which resulted in conviction. In Jessore the Sanitary Inspector regularly inspected food-stuffs and detected some cases of adulterated ghee. Four prosecutions were started which ended in conviction. In the Kotechandpur municipality the sale of confectionary articles and fish was controlled under the supervision of the Municipal Health Officer. At Dacca a considerable quantity of unwholesome food-stuffs was destroyed. Some of the municipalities arranged lantern lectures and distributed health leaflets throughout their areas for the purpose of educating the people on sanitation and public health.

Effective steps were taken to prevent the spread of cholera which broke out in several municipalities. In the district of Bankura all the municipalities followed the instructions issued by the Director of Public Health on the subject. When an outbreak occurred people were warned against using the water of suspected tanks and wells. Other tanks were guarded against pollution. In Bankura and Vishnupur a stock of disinfectants was kept for free distribution. The Bankura municipality treated the indigent cholera patients free of charge.

In the Murshidabad municipality public and private wells were periodically disinfected with permanganate of potash and chlorogen, and public drains were regularly flushed with phenyle and chloride of lime. At Khulna, during a widespread epidemic of cholera, the town was saved from contamination by timely measures of prevention, such as disinfections of tanks and houses, and the distribution of health leaflets. Small-pox broke out in epidemic form at Berhampore and Rajshahi, but timely action of the Commissioners prevented any serious extension of the epidemics.

Stringent measures were taken up by a large number of municipalities to vaccinate and re-vaccinate children and primary and secondary vaccinations were in most cases given free of charge. Many of the municipalities employed permanent vaccinators for the purpose.

The intensity of malarial fever was checked in many municipalities by filling up and disinfecting insanitary tanks, etc. As an anti-malarial measure quinine and cinchona febrifuge were also freely distributed by many municipalities. Influenza tabloids were also distributed free to the poor by many municipalities.

Except for comparatively slight outbreaks of relapsing fever, the town of Darjeeling was free from epidemic diseases. Influenza became endemic and was responsible for one-seventh of the total mortality. Serious overcrowding and lack of sanitary dwellings in certain areas of the town gave rise to a high percentage of deaths from tubercular disease, and phthisis accounted for 14·3 per cent. of the total mortality. Except for a short-lived outbreak of influenza at the beginning of the year, the health of the town of Kurseong was, on the whole, fairly good.

In Chittagong and Barisal there were no Health Officers and the public health work was managed by the Sanitary Inspectors; the appointment of Health Officers, which is a statutory obligation, was insisted upon the Municipal Commissioners. At Berhampore a Health Officer was appointed towards the close of the year.

By-laws were framed by a number of municipalities for the eradication of the water-hyacinth, and notices under section 200 of the Bengal Municipal Act were issued by some of them for the removal of this pest from tanks and waterways.

14. Public Works.—The percentage of the outlay on public works to the total expenditure varied in the smaller towns from 1·3 in Katwa to 52·08 in Kharar and in larger municipalities from 4·6 in Serampore to 40·8 in the South Suburban municipality.

The Baranagar municipality expended Rs. 22,894 in the construction of its Office building in a part of which a local library is proposed to be located.

15. Loans.—Loans amounting to Rs. 1,35,001 were granted to five municipalities, viz., Burdwan (Rs. 30,000), Raniganj (Rs. 50,000), Howrah (Rs. 36,334), Dacca (Rs. 15,000), and Faridpur (Rs. 3,667). Altogether 43 municipalities were in debt to Government, their total liabilities amounting to more than Rs. 39 lakhs. South Suburban, Birnagar and Bhola fully liquidated their loans.

16. Audit of Accounts and Embezzlements.—The accounts of almost all municipalities except Gobardanga were audited during the year. Embezzlement or misappropriation of municipal money occurred in Bankura, Hooghly-Chinsura, Maniktola and Baraset. The amounts misappropriated, which are not reported in all cases, were, however, realised from the culprits and the officers concerned were dismissed. The longstanding question of embezzlement of hackney-carriage fees of the Rajshahi municipality, which dates back to 1919, was brought to a final decision after the close of the year with the result that the hackney-carriage inspector was discharged and the officiating tax daroga was transferred to a less responsible post.

The municipal authorities of Comilla took prompt and suitable action in remedying the defects and irregularities pointed out by the Examiner of Local Accounts. Unfortunately, however, little attention is generally paid by municipalities to audit reports. The Minister takes this opportunity of pointing out to municipal bodies the fact that these audits are intended for the assistance of the local authorities themselves and that specific defects and irregularities are brought to light not in a spirit of captious criticism, but with a view to suggesting necessary steps being taken for having them remedied.

17. General Remarks—Burdwan Division: Howrah.—The total ordinary income of the municipality fell from Rs. 15,99,554 to Rs. 15,92,551. The decrease is mainly attributed to the fall of receipt under the Fire Brigade Act and to the non-receipt of any contribution from the public for any improvement work. Expenditure rose from Rs. 12,62,192 to Rs. 14,00,146 mainly on account of increased outlay under the heads "Water Supply," "Roads" and "Conservancy." There was a revision of assessment in wards 4 and 8. The current demand on account of municipal taxes rose from Rs. 14,91,245 to Rs. 16,70,330. The financial position of the municipality has improved within recent years.

The duties of cleansing the roads, drains and privies in the town was, as before, vested in the Ward Committees. Both the Chairman and the Commissioner of the Division complain of their inadequate supervision and of want of sympathy and co-ordination with the central municipal authorities. The question of the disposal of street sweepings is getting more acute year by year owing to the difficulty in finding dumping grounds. The watering arrangement of the town has been greatly improved; in addition to 21 road-watering carts, two road-watering lorries were purchased.

The expenditure under "Public instruction" shows a slight falling off. The scheme prepared by Mr. Biss for the advancement and extension of primary education could not be taken up as it involved the imposition of additional taxation. The Municipal Commissioners, however, decided to take up four of the existing primary schools and to make education free in them.

The health of the town has improved during the last three years, the birth-rate is steadily increasing, the figures for the last 3 years being 20·20, 22·06 and 25·48 per mille, respectively, while the number of deaths has gradually decreased since 1920-21. There were no epidemic diseases during the year. To remove infantile mortality four qualified midwives were appointed under the supervision of the Health Officer.

The municipality of Burdwan was administered with great efficiency. A scheme for replacing the worn out engines and boilers at an estimated cost of Rs. 1,30,000 was taken up during the year and considerable progress made. Kalna was at one time notoriously unhealthy, but during the last 10 or 15 years it has improved in respect of malaria, though typhoid and kala-azar have become prevalent. The system of treatment of kala-azar by antimony injections, which was introduced by Dr. Muir in the Scottish Mission Hospital, was continued. The success obtained from this method of treatment has led to an influx of patients from other places, and it is to this circumstance that the Municipal Commissioners attribute the spread of the disease among the permanent residents of the town. The crying need of the town of Katwa is filtered water, but the municipality is making no provision for a supply. The first elected Municipal Board of Asansol has been formed and it is hoped that the affairs of this municipality will now rapidly improve. The finances of the Midnapore municipality continued to be unsatisfactory. The water-works scheme of the municipality was hung up for inadequacy of funds, but steps are now being taken for completing an important part of the scheme. At Chandrakona dissension and party feeling prevented any useful work being done.

The District Magistrate of Hooghly is of opinion that the two largest municipalities, viz., the Hooghly-Chinsura and Serampore are the worst managed. The finances of the former show some slight improvement, but the outstanding balance being still so high as Rs. 21,000, the improvement is purely nominal and is unaccompanied by better work in other departments.

of the municipality. For want of continuous supervision over the collecting staff, collections are neglected and arrears allowed to accumulate. Other branches of administration have also suffered and the people are reported to be growing dissatisfied with the present management of the municipality. The Serampore municipality was faced with bankruptcy which has been averted by the recent assessment which will add 25 per cent. to its income. Party faction was noticeable in Kotrung. Much improvement has been effected in the Bansberia municipality by the construction of a mill in Ward No. I and by the clearance of jungle by another mill in Ward No. III. The general health and sanitation of Baidyabati has improved, but the municipality is notorious for party factions. The collections in Campdany were very satisfactory.

18. Presidency Division.—Mr. Prentice, the late-Magistrate of the 24-Parganas, remarks as follows :—

“ There continue to be too many municipalities whose administration falls far below what it ought to be. Panihati, Tollygunge, Rajpur, Basirhat, Joynagar and Baduria are all bad, and there are some others which might easily be better than they are. In places like Joynagar the Municipal Commissioners decline to enforce any of the much-needed improvements because private interests will thereby be affected and zamindars and others are not ashamed to derive income from markets which are insanitary. The scheme for a railway market at Kanchrapara still hangs fire and no progress has been made with the project for a municipal market in Bhatpara. No great progress appears anywhere in jungle-cutting or filling up insanitary *dobas* and there is a general want of vital civic co-operation. Rate-payers do not keep their own holdings clear.”

The municipal administration in the district of Murshidabad was fairly well managed as far as municipal funds permitted, and the health of municipal towns was generally good. The standards of collection in the Khulna municipality were again high, and freedom from epidemic disease enjoyed by the town was attributed to good administration. On the other hand, the work of the small municipality at Debhata was extremely unsatisfactory. When the District Magistrate inspected it on the 23rd March 1923, it had carried out only three-eighths of the budgeted expenditure, had spent only one rupee out of a budgeted capital outlay on drains of Rs. 100, and had been without a sweeper throughout January and February. Its standards, traditionally low, were further depressed during the year by local class feuds. A general election was set aside, and a second election which was held resulted in the unseating of the *bhadralog* class.

The Commissioner of the Division observes :—“ The few good municipalities do excellent work considering the very limited means at their disposal, but there are a large number which have in no way fulfilled the hopes of their founders. In many places the Commissioners have yet to learn the great responsibility involved by their position not only in spending carefully the money for the ratepayers but also in realising their dues promptly.”

19. Dacca Division.—The state of affairs in the Dacca municipality is unsatisfactory. The latrine service is indifferent, the water-supply is deficient, and the conditions of the roads leave much to be desired. The revaluation was long overdue and the successive bodies of Commissioners who omitted to have the town revalued are partly to blame for the present discomforts of the ratepayers. The present Commissioners have at last made a general revaluation. In this connection the Divisional Commissioner observes as follows :—

“ The Municipal Commissioners of Dacca are to be congratulated on reducing the outstanding balance of taxes from Rs. 51,524 to Rs. 24,010 and on

DACCA DIVISION.

Mr. Khwaya Nazimuddin, M.A. (Cantab.), Bar-at-Law, Chairman,
Dacca.

Babu Keshab Chandra Banerjee, Vice-Chairman, Dacca.

Mr. DeLisle, Chairman, Narayanganj.

Babu Rajendra Kumar Naha, Vice-Chairman, Narayanganj.

Babu Akshoy Kumar Saha, Chairman, Madaripur.

Babu Moti Chand Kundu Poddar, Vice-Chairman, Madaripur.

Babu Surendra Nath Roy, Chairman, Faridpur.

Babu Tarak Chandra Chatterjee, Vice-Chairman, Faridpur.

Babu Sarat Chandra Guha, Chairman, Barisal.

Babu Nil Ratan Mukherjee, Chairman, Nalchiti.

CHITTAGONG DIVISION.

Babu Bepin Behari Rakhit, Chairman, Cox's Bazar.

Babu Upendra Mohan Mitra, Chairman, Comilla.

By order of the Government of Bengal
(Ministry of Local Self-Government),

G. S. DUTT,

Secretary to the Government of Bengal (offg.).

SUPPLEMENT TO THE CALCUTTA GAZETTE, MAY 7, 1924.

FORM NO. I.—Statement showing the constitution of the Municipalities in the Bengal Presidency during the year 1922-23.

**RESOLUTION ON THE REPORT ON THE OPERATIONS OF THE DEPARTMENT
OF AGRICULTURE FOR THE YEAR 1922-23.**

GOVERNMENT OF BENGAL.

DEPARTMENT OF AGRICULTURE AND INDUSTRIES.

Agriculture.

DARJEELING, THE 30TH APRIL 1924.

RESOLUTION—No. 137T.—A.I.

Minister in charge : The Hon'ble Hadji Mr. Abdul Karim Abu Ahmed Khan Ghuznavi.

READ—

The Report of the Department of Agriculture, Bengal, for the year 1922-23.

Mr. G. Evans held charge of the department till 16th October 1922, when he went on leave preparatory to retirement. Mr. R. S. Finlow officiated as Director for the rest of the year. Mr. K. McLean, Deputy Director of Agriculture, was appointed to act as Fibre Expert to the Government of Bengal. Mr. F. Smith, Deputy Director of Agriculture, proceeded on leave for fifteen months from the 27th November 1922. Two new posts of Deputy Director of Agriculture were sanctioned by the Secretary of State at the close of the preceding year, but it was not possible to fill them permanently for want of suitable recruits. It has since been decided not to fill the posts for the present as, until the number of farms in working order increases, the staff of three Deputy Directors appears to be sufficient for the needs of the department. Mr. M. Carbery continued as Agricultural Chemist, and Messrs. G. P. Hector and Dwijadas Datta as first and second Economic Botanists, respectively, throughout the year.

2. Although the decisions of Government on the recommendations of the Bengal Retrenchment Committee relating to the Agricultural Department were taken after the close of the year under report, it is necessary to indicate the policy underlying these decisions to remove misapprehension. As regards the demonstration and propaganda branch of work of the department for which a large subordinate staff of District Agricultural Officers and demonstrators were employed under the Superintendents of Agriculture in charge of divisions, it has been definitely decided that the work of demonstration should radiate from the district agricultural farms where the necessary technical staff of District Agricultural Officers and demonstrators will exist, whilst propaganda, so far as it is non-technical, should be carried out with the assistance of the District Officer and his staff, the staff of the Co-operative department and the Agricultural Associations. The district and departmental staff will in the course of their ordinary duties in the mufassal draw the attention of the cultivators to the improvements effected by the agricultural department and induce them to get into touch with the farms. It will then rest with the technical staff at the farms to demonstrate the improvements of crops, seeds, manures, implements etc.

Next to research and the research stations, the district agricultural farms, therefore, occupy an important place in the organisation of the department. Whilst, however, the functions of these farms must include experiment as well as demonstration, it is also necessary that they are to convince people, some portion of each of them must be set aside for the purpose of bringing home to the public the economic proposition recommended by the department can be made to pay. A definite effect has accordingly been taken by the department.

As a corollary to the policy of concentrating the activities of the department around the farms the Government of Bengal in the Ministry of Agriculture and Public Works have also accepted the principle of the maintenance of

14,066

and the distribution of seeds are matters not of agriculture but of organisation. Orders have accordingly been issued for the abolition of seed stores outside the farms.

3. Of the 19 Bengal students in the second year class of the Sabour Agricultural College which closed at the end of the session 1922-23, 18 passed the final examination. The number of students on the roll in each of the Secondary Agricultural Schools at Dacca and Chinsura was 16 in the first year class, while there were 20 and 17 students on the roll in the second year class in the respective schools. Eleven students passed the final examination in the Dacca School and 14 in the Chinsura School. The Government of Bengal (Ministry of Agriculture and Public Works) have since on the recommendation of the Bengal Retrenchment Committee decided to close the Chinsura School, since it appears that full advantage has not been taken of the facilities offered by the school.

The scheme for agricultural education referred to in the resolution recorded on the report for the year 1921-22 was not proceeded with as there was no likelihood of funds being obtainable. For similar reasons the proposed Agricultural Institute at Dacca was not proceeded with. This is not to say that the Agricultural Department and the Government of Bengal have lost sight of the importance of agricultural education either in its more elementary form as at schools such as the report mentions as existing in Manarpur (Burdwan) and Durgapur (Chittagong) or Dacca, or in its more advanced form as contemplated in the proposed Agricultural Institute at Dacca, and it is to be hoped that it will be possible to take up these questions in the near future. Mere theoretical training will not commend itself and any scheme of agricultural education to prove acceptable must be such as to direct students back to the land and the practical pursuit of a profession on lines which it will first be proved are profitable.

4. Satisfactory progress continued to be made in the research side of the department. The evolution of improved races of jute and the reaffirmation of the values of previous discoveries in regard to jute, some of which had begun to be challenged, naturally received special attention, but investigations were also carried out in hemp, flax and other fibres. At present D. 154 is the standard departmental race of *C. capsularis* and the best yielder. Two other races D. 27 and 39X, a hybrid, are also under trial. Over 600 single plant cultures of *C. capsularis* were made during the year with the object of improving on D. 154. Work on *chlorosis* in jute in collaboration with the Economic Botanist was continued. Results obtained by crossing *chlorotic* with non-*chlorotic* races of *C. capsularis* have so far indicated that the *chlorotic* tendency is more extensively inherited through the female than the male plant.

The question of the superiority of departmental races of jute in fibre and spinning qualities over local races came under discussion with the trade during the year. Arrangements have been made for the conduct during the present year of a series of field tests in the Eastern and Northern Bengal districts with the departmental races of R. 85 and D. 154 and *Funduk*, a variety which is believed to be of a very high quality by the trade.

The Bengal Chamber of Commerce has nominated a committee to co-operate with the department in these matters and to advise it in regard to the requirements of the trade. The Government of Bengal (Ministry of Agriculture and Public Works) are gratified to notice the interest which the departmental races of jute have roused, and will await the result of the field experiments undertaken by the department.

The report of the Committee appointed to devise ways and means to eradicate the water hyacinth was received and considered during the year. The members of the committee were unable to come to a unanimous conclusion on the important question of the measures to be taken for the eradication of the weed. They did, however, reach a unanimity about the efficacy of the spray, the use of which was given by its inventor, Mr. T. S. Griffiths. The experiments conducted on a small scale at Dacca under the supervision of the experts of the department afforded grounds for believing that the fluid used by Mr. Griffiths, although harmless to human

beings and animals, resulted on application in the destruction of the water-hyacinth. As the Government of Bengal were of opinion that no possibility of securing an efficacious means of dealing with the pest should be neglected they decided to follow up their previous experiments and to endeavour to obtain some conclusive result. Communications were accordingly addressed to Mr. Griffiths as a result of which he offered the use of his spray to this Government for a period of three years for a payment of £1,500 with the option to purchase all rights in it in Bengal for a further payment of £6,000 at the end of three years if this Government were fully satisfied with their experiments during that period. The Government of Bengal (Ministry of Agriculture and Public Works) are satisfied that the offer is reasonable and have accepted it.

5. As usual, rice continued to receive particular attention in the Botanical Section, though minor investigations were also carried out in cotton, pulses and oil seeds. Varietal tests in a record season at Dacca and in an unfavourable season at Chinsura have again proved the superiority of *Indrasail* and *Dudshar* paddy, whilst *Kataktara* is still without a rival in Eastern and Northern Bengal as a high land broadcast *Aus* rice.

Amongst *Rabi* crops a number of pure races of *Matikalai* with promising qualities have been selected.

The Second Economic Botanist is in charge of the investigations into cotton, deep-water paddy, pulses and oil seeds.

The cotton survey of the province is still being conducted. It is estimated that the total area under cotton in Bengal is 60,000 acres, of which 5,000 acres are ordinary cotton and the remainder is *Comillas*. It is interesting, even if it may not prove to be important, that types of cotton answering Roxburgh's description of Dacca muslin cotton have been discovered at Dewa⁴⁴⁷ (Mymensingh) and Rangpur.

6. In the Chemical section special attention was given to sugarcane, date-sugar and tobacco. Although the drought in the early part of the year proved disastrous to the sugarcane crop it was not without its lesson, as it demonstrated the exceptional drought-resisting capacity of the departmental race of *Tanna*. Two other new Coimbatore hybrid races, viz., Madras Nos. C.213 and C.214, have also been found to be good resisters of drought. They also promise to tiller better and to yield a purer juice. Experiments have shown that high glucose content of the juice of sugarcane grown on the red laterite soil of Dacca is due to the soil's deficiency in lime as well as to the lack of moisture which was hitherto believed to be the chief cause.

Manurial experiments with tobacco indicate that groundnut cake and fish manures yield good results.

7. Gratifying progress has been made with the programme of evolving an improved breed of cattle at the cattle-breeding station, Rangpur. The process of selection of cows has resulted in a marked improvement in their yield of milk so that the minimum standard of milk yield per lactation period of 300 days has been raised from 500 lbs. in 1920 to 1,500 lbs. in 1923. To-day the best cows at Rangpur are giving about 4,000 lbs. of milk per lactation. Attention is also being given to producing in larger numbers bulls of good stature and belonging to good milking strain. The object is distribution amongst owners of cows, for it has been proved at Pusa that it is through the sire that the milking strain passes. Selection work on the herd of Sindhi cattle at the Dacca Farm is in progress. The work of cattle fodder which has an important bearing on the improvement of cattle has also been engaging the attention of the department. Numerous fodder crops, both indigenous and exotic, are being tested with a view to ascertaining their value and giving the public the benefit of the results.

8. During the year an Agricultural Engineer with a staff of 14 was employed with the object of executing minor irrigation schemes for the improvement of agriculture in the Bankura, Birbhum and Midnapore districts. Apart from schemes under the Bengal Agricultural and Sanitary Improvement Act, 1920, there was a large number of co-operative irrigation schemes in the Bankura and Birbhum districts which called for the special attention of the Agricultural Engineer. Besides irrigation work a number of applications were received for the drainage or re-excavation of water-courses.

rivers and *bheels* under the Bengal Agricultural and Sanitary Improvement Act. It is hoped that if advantage is largely taken of the provisions of the Act much benefit from the sanitary as well as the agricultural point of view will result.

9. As already indicated agricultural associations play an important part as a link between the department and the *raiyats*. They also afford a real test of the interest taken by the public in the welfare of the agricultural population. Noteworthy among these associations are those of Nadia, Birbhum, 24-Parganas, Pabna and Rangpur. Agricultural associations run on co-operative lines have great possibilities and the distinguishing merit of self-help. In Pabna an innovation has been made in the establishment of agricultural co-operative societies with small areas for the demonstration of improvements and the production of seed of departmentally selected crops. A further experiment in collaboration with the co-operative department is the proposed establishment of societies for the purchase and sale of jute seed with the object of developing reliable private agencies for the propagation of improved seed under the expert advice of the Agricultural Department.

10. Mr. P. C. Chaudhury, Deputy Director of Sericulture, Bengal, assisted by two Superintendents was in charge of seed cocoon production during the year. Miss Cleghorn also continued to work at Alipore. The total receipts from the nurseries amounted to Rs. 61,188 against Rs. 59,381 and the expenditure to Rs. 1,81,254 against Rs. 1,62,460 in the preceding year. It is, of course, not to be expected that the receipts should cover all the expenditure, since the object is to revive the industry by popularising disease-free seed. The falling off in receipts is, however, unfortunate. The receipts should go on increasing until the loss to Government becomes very much less than at present. The falling off is attributed to the shortage in cocoon production resulting from abnormal weather conditions such as drought, flood, etc., as well as to the heavy budget curtailment at the end of the year which necessitated the practical abandonment of the *Maghi* programme. Nevertheless, there was a marked advance in placing the work of this section on a sounder basis than before. It has now been definitely decided that in present circumstances hybridization should be abandoned as unlikely to produce good results. Results of manurial experiments too indicate that the yield of leaf is capable of a large increase, and formalin, which is at present used as a disinfectant, is being tentatively replaced by a substance called "E.C." invented by Mr. Hutchinson, the Imperial Bacteriologist. "E. C." has been found to be far more powerful and also less costly than formalin. The multiplication and distribution of disease-free seeds are still the main items in the programme of the Sericultural Department, and the encouragement of selected rearers to produce seeds under departmental supervision is so far shown to be sound. The Bengal Silk Committee was reconstituted at the close of the year so as to secure the representation of the silk trade, both European and Indian, and the cocoon rearers and silk reeler in that body, but so far no meeting of the Committee has taken place.

11. The Hon'ble Minister has much pleasure in acknowledging the services of Mr. Finlow, Officiating Director, for his administration of the department during the year. His acknowledgments are also due to the other members of the department whose services Mr. Finlow has brought to notice. The Minister also takes this opportunity of placing on record his appreciation of the assistance rendered by Mr. G. S. Dutt, I.C.S., and Mr. Perjee Bahadur in the agricultural development of the Bankura

order of the Government of Bengal

(Ministry of Agriculture and Public Works).

J. T. DONOVAN,

Secretary to the Government of Bengal (offg.).

Statement showing the quantity of Salt in Bonded Warehouses and affixed on the river Hooghly on the 15th day of April 1924 and transactions during the half-month from the 1st to the 15th April 1924.

RAMPUR BOALIA, the 26th April 1924.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 30th April 1924.

Summary.—The rainfall during the week was generally light almost throughout the Province. Sowings of jute and paddy are proceeding briskly, but more rain is still wanted in places especially in the western districts. Prospects of standing crops are satisfactory. The average price of common rice for the Province has risen by about 0.25 per cent., as compared with that of the previous week.
